

# OEM pressure sensor For mobile working machines Model MH-4

WIKA data sheet PE 81.63

## Applications

- Working pressure measurement
- Control pressure measurement

## Special features

- Robust and compact design for extreme operating conditions
- Stable electronics ensure optimal performance over the entire lifecycle
- Easy, individual integration through high variation and identification possibilities

OEM pressure sensor, model MH-4

## Description

The MH-4 is a highly flexible, extremely resilient pressure sensor. Because the challenges in practice are high: Pressure sensors are subjected to heavy mechanical stresses and must provide accurate data for safe machine operation, even under the most demanding environmental conditions. With excellent performance stability, the MH-4 ensures dependable operational reliability throughout its entire service life. Since it is maintenance-free, the MH-4 is operating cost-neutral.

### Robust in the field

Even when things get tough, vibration and shock are no problem for the MH-4. The use of resistant materials makes the pressure sensor particularly suitable for the highest requirements. This is also confirmed by the results of standardised and customer-specific test procedures. Continuously high accuracy in the measurement of operating and control pressures ensures the reliability and performance of the system at all times.

### One for all eventualities

The compact design allows quick and easy integration of the pressure sensor into virtually any system. With a wide variety of possible mechanical and electrical connections, as well as output signals, it adapts easily to the circumstances of the particular system. The large selection of measuring ranges makes the MH-4 effective and ready-for-use for the widest range of applications.

### Easy individual integration

The MH-4 pressure sensor can easily be used within series production and in after-sales service. The brand labelling option enables effortless identification within the entire supply chain. For further individualisation the colour of the plastic parts can be optionally selected on request. Possible confusion in the receiving department, in the production line or in the field is thus effectively prevented.

## Measuring ranges

Gauge pressure				
bar	0 ... 40	0 ... 60	0 ... 100	0 ... 160
	0 ... 250	0 ... 400	0 ... 600	0 ... 1,000
psi	0 ... 500	0 ... 1,000	0 ... 1,500	0 ... 2,000
	0 ... 3,000	0 ... 5,000	0 ... 8,000	0 ... 10,000

1 bar = 0.1 MPa

Other measuring ranges on request

### Overload safety

≤ 400 bar [≤ 5,000 psi]: 3 times

600 bar [8,000 psi, 10,000 psi]: 2 times

1,000 bar: 1.5 times

The overload safety is based on the measuring range. Depending on the selected process connection and sealing, restrictions in overload safety can result.

### Vacuum tightness

Yes

## Output signals

Signal type	Signal
Current (2-wire)	4 ... 20 mA
Voltage (3-wire)	DC 1 ... 10 V
	DC 1 ... 5 V
	DC 0.5 ... 4.5 V
Ratiometric (3-wire)	DC 0.5 ... 4.5 V
Pulsewidth modulation PWM (3-wire)	10 ... 90 % pulse-duty factor High level: DC 3 ... 12 V (selectable in 1 V steps) Output frequency: 0.25 ... 2 kHz (selectable in 0.25 kHz steps)

Other output signals on request

### Signal clamping (option)

The range of the output signal can be limited. For this purpose, a lower and an upper signal threshold are defined in the sensor electronics. If the output signal reaches these threshold values, the sensor outputs a defined, constant signal value. Therefore, in operation, unwanted pressure or signal ranges are filtered out.

### Diagnostic function (option)

Permanent errors in the sensor electronics and temporary system overpressures can be output through defined constant output signals. A permanent error signal signifies a sensor defect and cannot be reset. The temporary error signal is reset as soon as the system pressure once again lies under the error threshold. In the application, one can therefore realise an efficient system diagnosis.

### Load

- Current (2-wire): ≤ (power supply - 7.8 V) / 0.022 A
- Voltage (3-wire): ≥ max. output voltage / 1 mA
- Ratiometric (3-wire): ≥ 4.5 kΩ
- Pulsewidth modulation (3-wire): ≥ 10 kΩ

## Voltage supply

### Power supply

Max. power supply with UL approval: DC 35 V

#### ■ Current output (2-wire)

4 ... 20 mA:      DC 8 ... 36 V

#### ■ Voltage output (3-wire)

DC 1 ... 10 V:      DC 12 ... 36 V

DC 1 ... 5 V:      DC 8 ... 36 V

DC 0.5 ... 4.5 V:      DC 8 ... 36 V

#### ■ Ratiometric output (3-wire)

DC 0.5 ... 4.5 V:      DC 5 V  $\pm$  10 %

#### ■ Pulsewidth modulation PWM (3-wire)

10 ... 90 % pulse-duty factor: (high level + DC 1 V) (min. DC 8 V) ... 36 V

### Total current consumption

■ Current output (2-wire):       $\leq$  25 mA

■ Voltage output (3-wire):       $\leq$  10 mA

■ Ratiometric output (3-wire):       $\leq$  10 mA

■ Pulsewidth modulation (3-wire):  $\leq$  10 mA

## Time response

### Settling time per IEC 62594

1 ms

### Signal damping (option)

2 / 4 / 9 / 18 / 37 / 75 / 150 ms

### Switch-on time

200 ms

## Reference conditions (per IEC 61298-1)

### Temperature

15 ... 25 °C [59 ... 77 °F]

### Atmospheric pressure

860 ... 1,060 mbar [12.5 ... 15.4 psi]

### Air humidity

45 ... 75 % r. h.

### Power supply

DC 24 V (DC 5 V with ratiometric output)

### Mounting position

Calibrated in vertical mounting position with process connection facing downwards.

## Accuracy specifications

### Non-linearity (per IEC 61298-2)

$\leq \pm 0.25$  % of span (BFSL)

### Long-term drift (per IEC 61298-2)

$\leq \pm 0.1$  % of span

### Total error band

Including non-linearity, hysteresis, non-repeatability, zero point and full scale deviation, temperature error, temperature hysteresis and error through atmospheric air pressure fluctuations

## Operating conditions

### Ingress protection (per IEC 60529 and ISO 20653)

see electrical connections

### Permissible temperature ranges

- Ambient: -40 ... +125 °C [-40 ... +257 °F]
- Medium: -40 ... +125 °C [-40 ... +257 °F]
- Storage: -40 ... +70 °C [-40 ... +158 °F]

Depending on the choice of sealing on the process connection, the electrical connection and UL approval, there may be limitations in the medium and ambient temperatures (for restrictions see “Process connections, sealings” and “Electrical connections”).

### Vibration resistance (per IEC 60068-2-6)

40 g, 10 .... 2,000 Hz

### Continuous vibration resistance (per IEC 60068-2-6)

10 g, 10 ... 2,000 Hz

### Shock resistance (per IEC 60068-2-27)

100 g, 11 ms

### EMC field

- Current output (2-wire): 100 V/m (per ISO 11452-2)
- Voltage output (3-wire): 100 V/m (per ISO 11452-2)
- Ratiometric output (3-wire): 100 V/m (per ISO 11452-2)
- Pulsewidth modulation (3-wire): 30 V/m (per IEC 61326-2-3)

### Service life

100 million load cycles

### Free-fall test (following IEC 60721-3-2)

Individual packaging: 1 m [3.28 ft]

Multiple packaging: 0.5 m [1.64 ft]

## Materials

### Wetted parts

304L, PH grade steel

### Non-wetted parts

304L, electrical connection made of highly resistant glass-fibre reinforced plastic (PBT)

## Process connections

Standard	Thread size	Max. nominal pressure	Sealing and temperature range	
			Standard	Option
DIN EN ISO 1179-2 (formerly DIN 3852-E)	G ¼ A	600 bar [8,700 psi]	NBR -40 ... +100 °C [-40 ... +212 °F]	FPM/FKM -20 ... +125 °C [-4 ... +257 °F]
DIN EN ISO 9974-2 (formerly DIN 3852-E)	M14 x 1.5	600 bar [8,700 psi]		
ISO 6149-2	M14 x 1.5	600 bar [8,700 psi]		
JIS B2351-1	G ¼ x 10, form O with collar	600 bar [8,700 psi]		
	G ¾, form O with collar	600 bar [8,700 psi]		
SAE J514	7/16-20 UNF-2A, O-ring BOSS	600 bar [8,700 psi]		
	9/16-18 UNF-2A, O-ring BOSS	600 bar [8,700 psi]		
	3/4-16 UNF-2A, O-ring BOSS	600 bar [8,700 psi]		
	7/16-20 UNF-2A, sealing cone 74°	800 bar [11,600 psi]	-	-
ANSI/ASME B1.20.1	⅛ NPT	400 bar [5,800 psi]		
	¼ NPT	1,000 bar [14,500 psi]		
KS	PT ¼	1,000 bar [14,500 psi]		
	PT ¾	1,000 bar [14,500 psi]		
ISO 7	R ¼	1,000 bar [14,500 psi]		
	R ¾	1,000 bar [14,500 psi]		
EN 837	G ⅝ B	400 bar [5,800 psi]	Copper -40 ... +125 °C [-40 ... +257 °F]	Stainless steel -40 ... +125 °C [-40 ... +257 °F]
	G ¼ B	1,000 bar [14,500 psi]		
	G ¾ B	1,000 bar [14,500 psi]		

Details must be tested separately in the respective application. The specified values for the max. nominal pressure serve only as a coarse orientation. The values depend upon the temperature, the seals used, the selected torque, the type and the material of the mating thread and the prevailing operating conditions.

Other process connections on request

### Restrictor (option)

As an option, for applications that can lead to pressure spikes, a restrictor with a pressure port of 0.3 mm is available.

### Spanner flats to screw in

Version	
Standard	Hexagon (SW 22) integrated into case
Option	Additional hexagon (SW 27) above the process connection. Suitable for the installation with socket wrench.

For details see dimensions

## Electrical connections

Designation	Ingress protection <sup>1)</sup>	Permissible temperature range
Circular connector M12 x 1, code A, 4-pin	IP67	-40 ... +125 °C [-40 ... +257 °F]
